Inhoud

General Introduction 9
The ‘Paradox of Modern Medicine’ 9
‘Window’: Evidence-Based Medicine 14
‘Coat Rack’: Professional Response and Mechanism of Control 22
‘Floor’: The Dutch Case of EBM 29
Structure 32
Sources, Working Method and Scope 35

Part I. Evidence-Based Medicine in International and Historical Perspective 45

Chapter 1. Evidence-Based Medicine and the Search for Certainty in the History of Medicine 47
Pierre Louis as Part of the EBM Rhetoric 50
The Issue of Certainty in Medicine: a ‘Permanent Battle of Methods’? 57
From Theory to Practice; ‘Louis’s Bifurcated Legacy’ 65
The ‘Probabilistic Revolution’ 70
Modernisation, Numbers and Control 73
The ‘Specificity Revolution’ 76
Conclusion: EBM from a Historical Perspective 79

Chapter 2. On an Incomplete Revolution: Epidemiology of Chronic Diseases, the RCT and the ‘Statistical Era’ in Medicine 85
Epidemiology of Chronic Diseases 87
Changes in Health Attitudes and Practices 91
Therapeutic Evaluation before the RCT Era 96
The Second World War as a Catalyst for the ‘First RCT’ 100
An Incomplete Revolution 103
The ‘Gold Standard’ 107
Conclusion 109
Chapter 3.
From Clinical Epidemiology to Evidence-Based Healthcare

Emergence of Clinical Epidemiology: Conceptual
Emergence of Clinical Epidemiology: Context
Breakthrough in the 1980s
Clinical Epidemiology at McMaster University
From Critical Appraisal to Evidence-Based Health Care
Criticism and Self-reflection
Conclusion

Part II.
The ‘Evidence Base’ of EBM: a History of Clinical Epidemiology in the Netherlands

Introduction to Part II

Chapter 4.
Epidemiology in the Netherlands

The First Independent Chair; the Role of Querido
Epidemiology and Social Medicine
The Rotterdam Department
The ‘Genius’ Miettinen
A New Era in Academic Research
Conclusion: the Growth of Epidemiology in the Netherlands in Context

Chapter 5.
Patient-related Research in Motion

The ‘Weakness’ of Patient-related Research in the Netherlands (early 1980s)
The Health Research Promotion Programme (the SGO)
‘The Discipline of Medicine’ and Clinical Epidemiology
A Movement in Clinical Research
A ‘Cultural Map’ of Medicine
International versus Specifically Dutch
Conclusion
# INHoud

## Chapter 6.
The Academic Establishment of Clinical Epidemiology in the Netherlands

- ‘The First Sub-department’ in Rotterdam
- Fertile Amsterdam Soil
- The Utrecht ‘Three Stage Rocket’
- ‘McMaasricht’
- Conclusion

## Part III.
**EBM in the Netherlands: the Rise (and Fall?) of a Mechanism of Control**

Introduction to Part III:

## Chapter 7.
The Need for a Mechanism of Control (1970s-1980s)

- 1970s: External Pressure and Professional Response
- Medicine and (Public) Health in Rapid and Accelerated Change
- Shifts in the 1980s: ‘From Healthcare Model to Management Model’
- Quality and Efficiency
- Consensus Guidelines and Clinical Decision Analysis
- Conclusion: a Fluent Transition to the EBM Era

## Chapter 8.
Borst-Eilers, Healthcare Policy and the Rise of EBM in the Netherlands

- From ‘Boundaries Debate’ to ‘Package Debate’
- Two Complementary Reports – Dunning and Borst-Eilers
- From Macro-Choices to Efficiency at the Micro Level
- From MTA to ‘Appropriate Medical Care’
- Admission of Weakness or Sensible Policy?
- Conclusion

## Chapter 9.
The Role and Impact of EBM in the 21st Century

- Detour 1: Professional Autonomy at Stake
- Detour 2: From Implementation (Problem) to Learning
- Detour 3: Opportunities and Threats
- Conclusion
Overall Conclusions 399
A Doctor’s Order: Two Aspects of EBM 399
Part I: Evidence-Based Medicine in International and Historical Perspective 401
Part II: The ‘Evidence Base’ of EBM: a History of Clinical Epidemiology in the Netherlands 404
Part III: EBM in the Netherlands: the Rise (and Fall?) of a Mechanism of Control 407
‘Marks’ as an Amendment to ‘Porter’ 412
Sources and Literature 419
Interviews 419
Articles and Letters from the Dutch Journal Medisch Contact 420
Other Dutch-language Sources and Literature 436
Literature in English or French 448
