

Contents

Preface	7
Chapter 1 Use of structural equation modeling to examine the relationship between learning patterns, teaching and learning environments and graduate attribute development <i>David Kember, Wincy S.C. Chan and Beverley J. Webster</i>	9
Chapter 2 Tackling methodological challenges to gain new insight into the complexity of student teacher learning in a dual teacher education program <i>Anja J. Boevé, Larike H. Bronkhorst, Maaike D. Endedijk and Paulien C. Meijer</i>	27
Chapter 3 Predicting academic performance: The role of cognition, motivation and learning approaches. A neural network analysis <i>Eva Kyndt, Mariel Musso, Eduardo Cascallar and Filip Dochy</i>	55
Chapter 4 Exploring conjoint analysis as a methodology to study implicit preferences within the context of educational and training sciences <i>Titia M. Zwarts, Gert Vanthournout, David Gijbels and Piet Van den Bossche</i>	77
Chapter 5 Taking qualitative studies beyond findings of a limited number of categories, with motivational orientation as an example <i>David Kember</i>	91
Chapter 6 Exploring students' emotions and emotional regulation of feedback in the context of learning to teach <i>Carol Evans</i>	107

Chapter 7

Longitudinal data collection: Mission impossible?

Tine Van Daal, Vincent Donche, Liesje Coertjens and Peter Van Petegem 161

Chapter 8

Theory on different levels

Huub van den Bergh 173
